Kansas KWIC 4.4 Overview of Health Interview and ATOD Changes

Health Interview Changes:

- All: moved vitamin/mineral info to ATOD
- Women: changed definition of high blood pressure from $\leq 130/80$ to $\leq 120/80$
- Women: removed PG question: # of vitamins/week in month before PG
- Children: moved household smoking question to new ATOD screen

ATOD Changes:

- All: KWIC requires opening ATOD and answer vit/min question
- All: Questions are worded in a suggested way to ask them
- All: new section “Supplements, Medication and Other Drugs”
- All: added smoking in vehicle and vaping questions (not tied to risk factor)
- Women: removed 3 months prior to PG questions
- Children & Infants: now have ATOD tab!
